

PICKET FENCES

Since 1980, Everlasting Fence Company has been providing customers with the best products in the industry and a level of service matched by none. Through intense product research and annual training, our salesman and installation teams can help you accomplish your fencing and overall outdoor design goals. Our standard picket fence designs are great for closing off your property for the dogs to run or the kids to play, all while offering a nice and welcoming feel to your home. With basic designs and more customized designs, with a multitude of adornments available, these fences can be personalized to make your home reflect you. Built with Western Red Cedar 1"x4" or 1"x6" lumber, or Pressure Treated if preferred, mounted to Western Red Cedar 2"x3" rails, 2"x4" for Pressure Treated fences, these panels will last for years. Our classic styles use a 2"x2" spindle, for a quainter look and "cape Cod" feel. They are sandwiched between 1"x4" to keep a consistent look on both sides

Wood: Western Red Cedar (WRC) or Pressure Treated (PT)

Spacing: 1" or 2" Spaced on standard styles
2" spacing on classic styles like Chestnut Hill & Valley Forge

2 1/2" spacing on Cape May

Pickets: 1" x 4" (actual 3/4" x 3 1/2") or 1" x 6" (actual 3/4" x 5 1/2") on standard styles
2" x 2" (actual 1 1/2" x 1 1/2") WRC only on classic styles

Rails: WRC 2" x 3" or PT 2" x 4", 1" x 4" WRC on classic styles

Heights: 36", 42", 48", 60", 72" or 96"

Pool Code: 48" high and up in 1" spaced
54" high and up in 2" spaced

Posts: PT 4" x 4" (actual 3 1/2" x 3 1/2") are standard, with options for 5" x 5" or 6" x 6"

*Above represents standard dimensions, but all fences can be customized.

Valley Forge Style

Cape May 2x2 Picket

2x2 Chesnut Hill

Modified Sautter Style

EXTENDED RAIL

The pickets are between the posts and extended backers are screwed to the back of the post. Commonly used with topped posts.

STANDARD RAIL

The panels are screwed to the face of the post. Commonly used with a flat top post.

BETWEEN THE POSTS

The panel is installed between the posts and fastened with screws. Commonly used with framed panels and capped or topped panels.

CUSTOM INSTALLATIONS

Installations can be customized to your design and vision. This fence was installed with doweled rails that slide into pre-drilled holes in the posts
