

# STAIN AND SEAL

Your fence can often be the largest part of your landscape and a large part of your budget. Staining is the first step you can take to preserve the natural beauty of your new fence or an economical way of extending the life of your existing fence. Staining will highlight the attributes that make natural wood beautiful and preserve them for years. Everlasting Fence Company offers Fence and Deck Stain and Seal services featuring Wood Defender products manufactured by Standard Paints, Inc.. We also offer these great products for the do-it-yourself homeowner at affordable prices. This allows you to maintain the "look" of a new fence or deck for years, while protecting your investment. For fences and decks that have already begun to fade or gray, we have a product for you too. We can bring the natural wood color back while killing the mold, mildew and fungus, prior to staining. These older fences are stained with a semi-transparent, lightly pigmented stain to help protect the newly exposed wood grain. New fences can be stained with either semi-transparent or transparent color choices. Because Standard Paints has designed this stain specifically for fencing, decks are stained using a transparent stain formulated for horizontal deck surfaces. Staining is one of the most economical ways to protect your investment and to improve the value and curb appeal of your property. Call Everlasting Fence Company today to setup a FREE estimate with one of our knowledgeable and friendly sales associates
